### ABOUT RIIFO

As a leading multinational corporation, RIIFO provides one-stop piping solutions with applications within the residential, commercial, agricultural, industrial, and infrastructural sectors. Forging ahead since 1996 and with over 8000 employees, 70 branches and subsidiaries, and 300,000 distributors, we served customers in more than 100 countries and regions.

We strive to provide our clients with an integrated value chain from Research & Development, Manufacturing and Distribution to fulfill our mission to provide the market with the best piping products and solutions.

### INNOVATION

**200**  
million USD

**923**  
patents

Our passion for innovation is reflected in our high-quality products and outstanding services, as we strive to offer ideal piping solutions to all.

### MANUFACTURING

RIIFO's state-of-the-art production facility, together with extensive and rigorous production control and management systems, harness the full potential of automated production.

Production Capacity

Pipe:  
**3.2 billion**  
meters per year

Fittings:  
**1.3 billion**  
per year

### Storage Capacity

**1,735,000 m<sup>3</sup>**  
(equivalent to 61,950  
Twenty-foot Equivalent  
Unit containers)

**200**  
hectares area  
totally

**4,000+**  
automated  
production lines

**10**  
production bases

**5200+**  
production staff

### GLOBAL MARKET

With our customer-focused services and effective marketing and branding, we don't just connect people, we connect cities across the globe. RIIFO will always be there to offer you support when you need it.

**1.5 million**  
registered plumbers

**3000**  
distributors

**100+**  
countries & regions

RIIFO locations shown on the map include: UK, Europe, North American, Mexico, Brazil, Chile, Argentina, South Africa, Nigeria, Ethiopia, Tanzania, Pakistan, China, Vietnam, Thailand, Philippines, and Indonesia. Each location is accompanied by a small photo of the local team.

## OUR VALUES

### Responsibility

We strive to continue to be a responsible and professional company that builds trust with its customers and contributes positively within society.

### Cooperation

We firmly believe that actively sharing our know-how with installers creates added value and shapes a better future.

### Innovation

Innovative use of technology and management has made significant contributions to our production, allowing our products to be more accessible and affordable for people around the world.

### Sincerity

We treat our customers with respect and take every opportunity to listen attentively to feedback.

## Responsible for Our Environment

RIIFO tirelessly strives towards energy saving and carbon emission reduction through technological innovation and production management. We continuously review our social responsibility and provide top-quality eco-friendly and affordable piping solutions to our global users.

We strive towards a greener and lower carbon production through the following measures:

- strict pollution control
- active development of more eco-friendly technologies
- conservation of energy and reduction of emissions
- economical and efficient use of material resources

## Good News: A New RIIFO Factory in South Africa is Coming!

RIIFO, a multinational piping supplier is very proud to announce that it will set up its 9th factory worldwide in Durban, South Africa. It is scheduled to go into operation by the end of this year. Once built, its annual production capacity for Multilayer Pipe is estimated to reach over 12 million meters, guaranteeing a stable piping supply for Africa. Further production lines will be added once the initial capacity has been reached.

RIIFO, in conjunction with their exclusive distributor in South Africa, SUNRIDGE, has big expansion plans for Multilayer, PPR and PVC piping systems in the African market. The

initial investment is nearly 7 million USD and the short-term vision is to invest an additional 5 million USD.

RIIFO strives to push forward the development in the African continent. RIIFO will work closely with the local governments. This project is committed to the re-industrialization of the South African economy, following the principles set down by the Minister of Trade and Industry. Additionally, RIIFO is positive that this will create a multitude of local jobs and will also support numerous skill development programs.
